Year 5

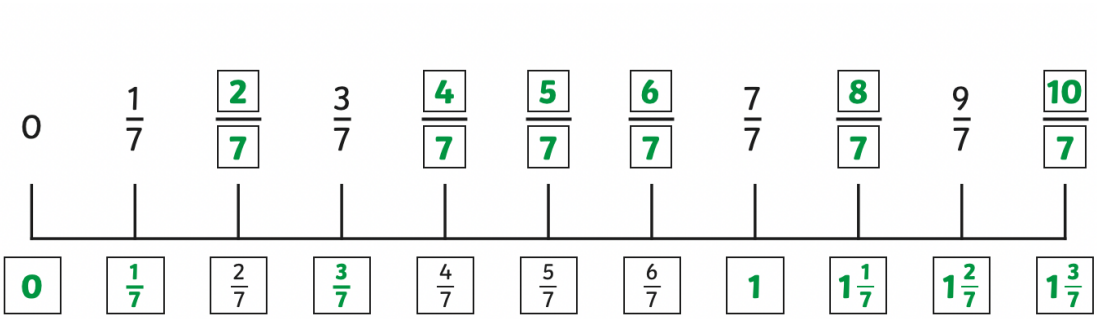

Maths

Focus: Year 4 Fractions recap – counting in fractions

Can you count in fractions? Here is an example of counting in fractions. The fractions underneath the numberline show mixed number fractions too! Can you remember what that means? It means that there is more than 1 whole!

Here is another example, this time counting in sevenths.

Try this:

Phillipe is counting in thirds. Spot and correct his mistake.

Spot and correct his mistake.

One third, two thirds, one whole,
one whole and two thirds, two whole ones,
two whole ones and one third,
two whole ones and two thirds,
three whole ones...

Answer:

Philippe has missed out one whole and one third when counting in thirds. He should have said this after saying one whole but, instead, he went straight to one whole and two thirds.
