Rainforest Calling

9:50 a.m.

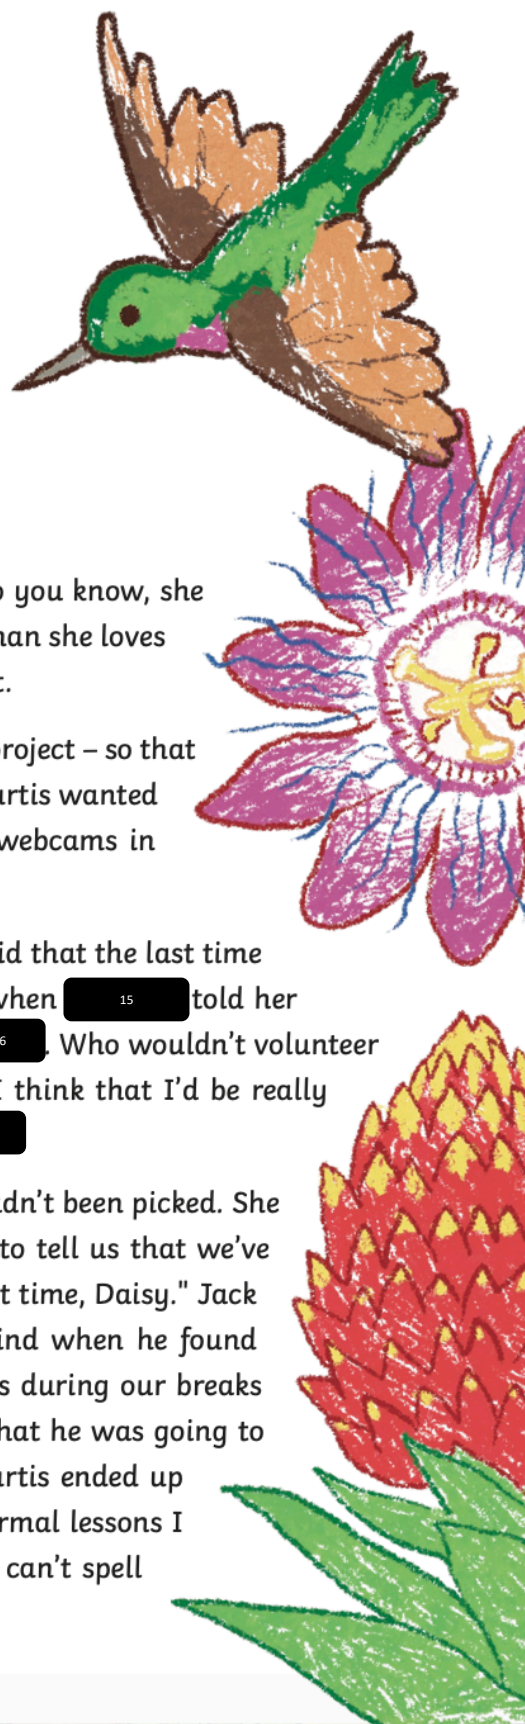

I wonder if ¹ person who gave the rainforest its name had ever ² been there. Surely, if they had, they'd have ³ it the 'plant forest' instead. Mrs Curtis, my ⁴, told us that more than two thirds of the world's plant ⁵ live in rainforest environments. That's more than 80,000 different ⁶!

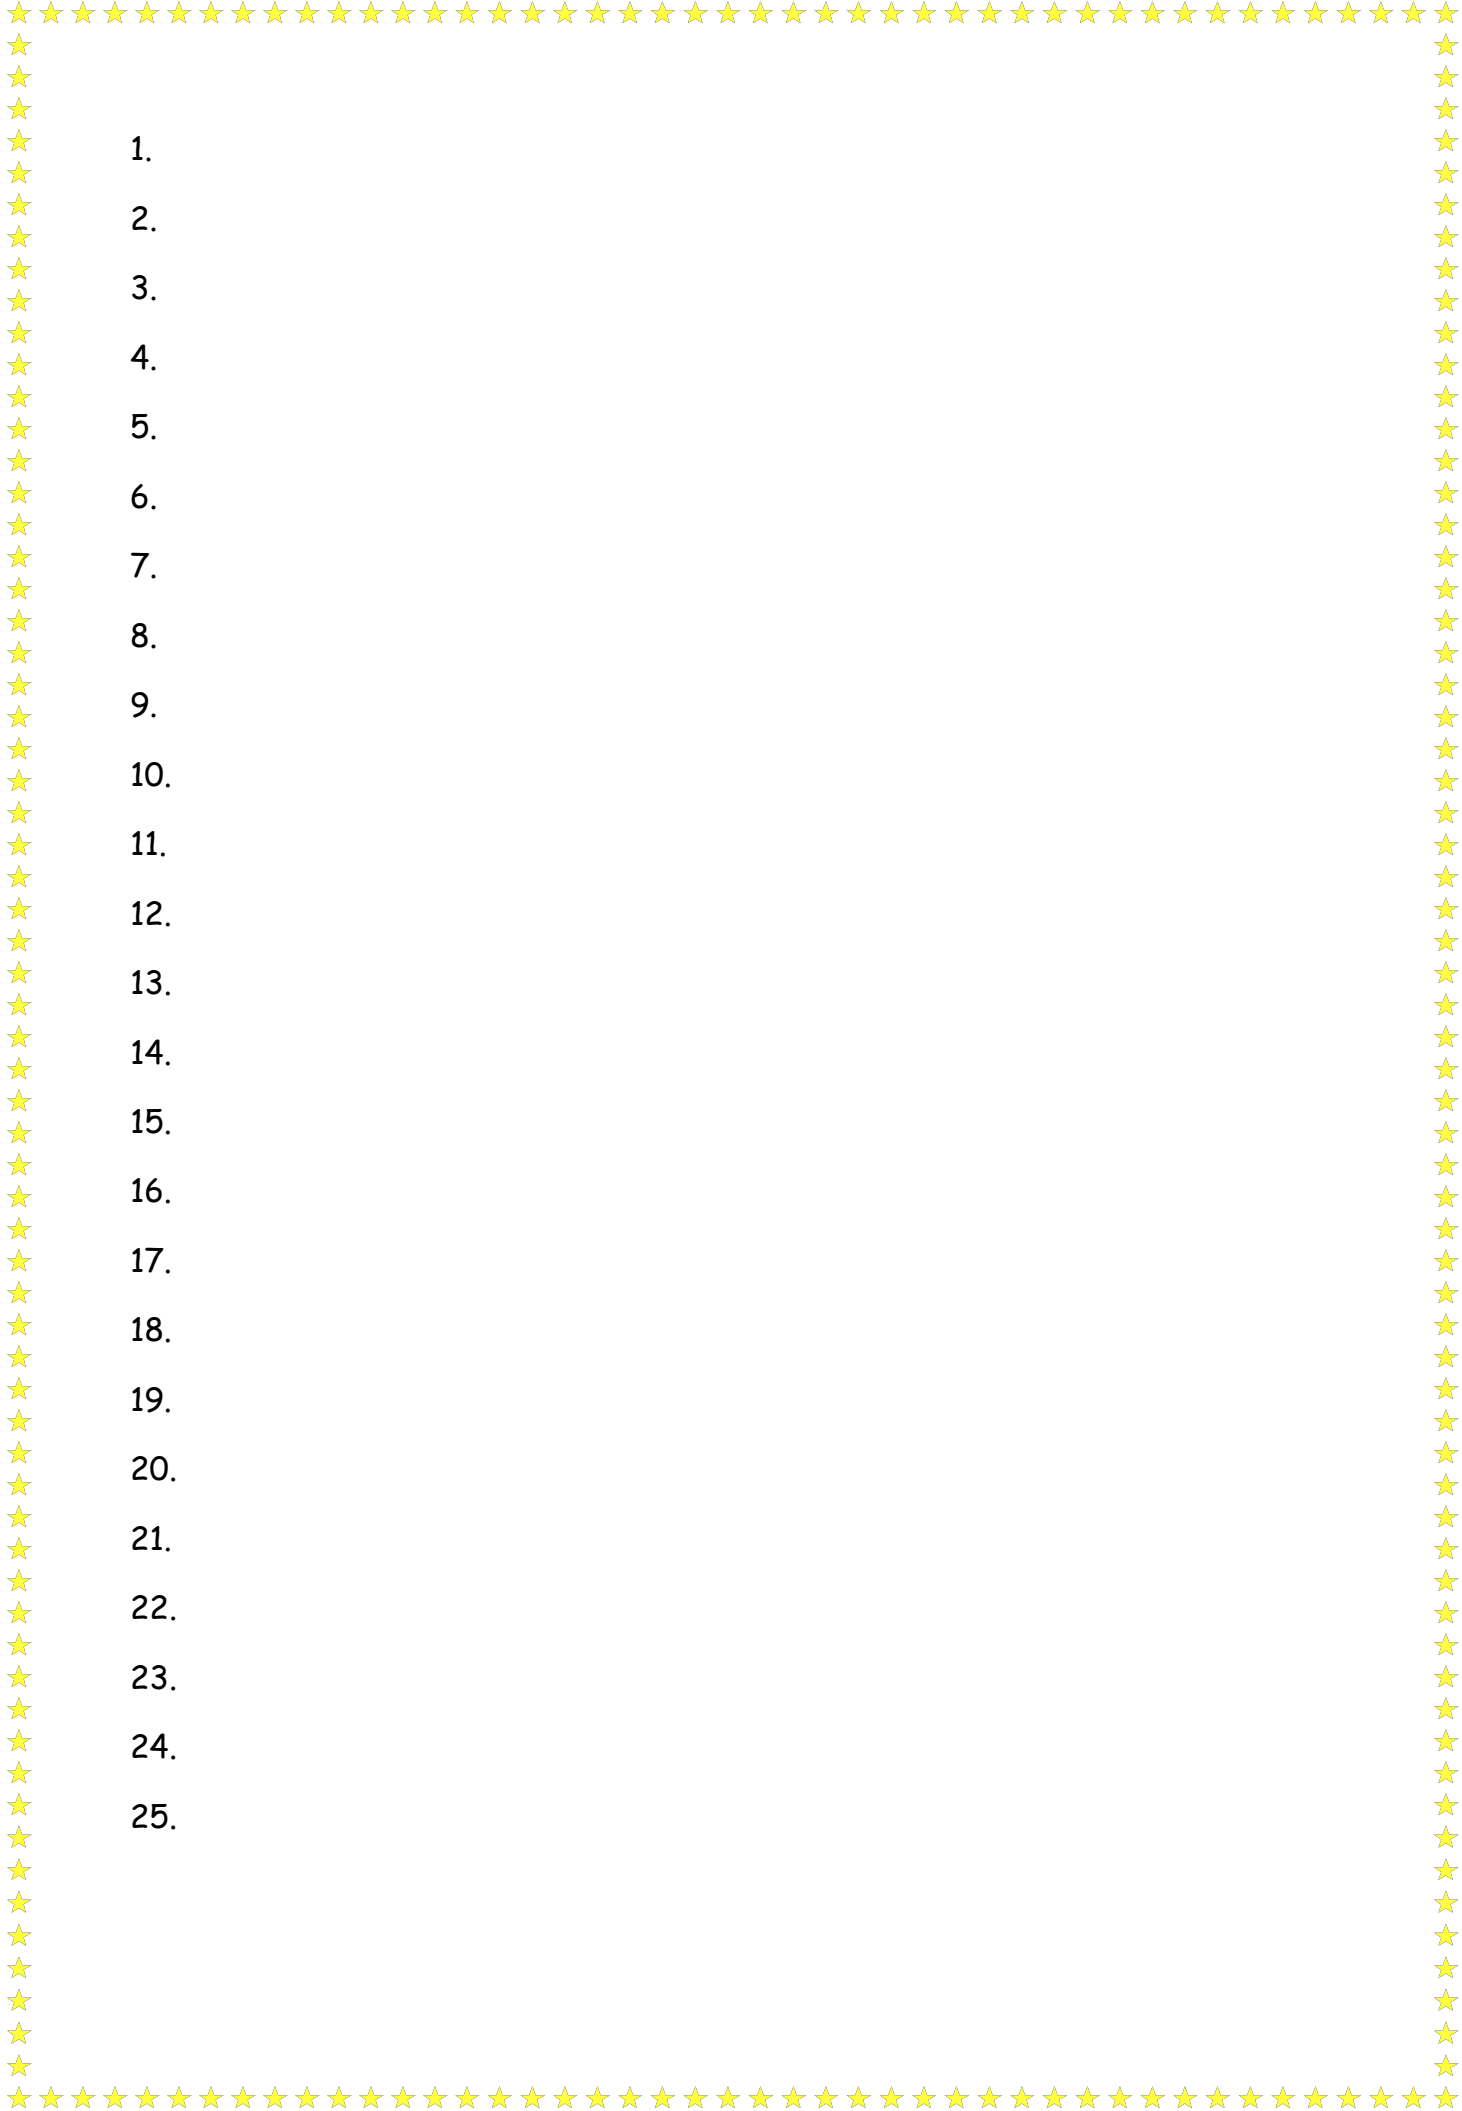

There's no way that I'm telling my Grandma Wilkins that! She'd be on the first plane to ⁷ with her lucky gardening gloves because she ⁸ loves plants. Do you know, she once told me that she might love plants even more than she loves my mum! Don't worry, I haven't told my ⁹ that.

That's one of the reasons why I ¹⁰ for this project – so that I could tell my ¹¹ about all the plants. Mrs Curtis wanted one of us to spend a whole week looking at some webcams in the Amazonian ¹².

I put my hand straight up. My best ¹³, Millie, said that the last time she'd seen anything move as ¹⁴ as my arm was when ¹⁵ told her daft brother that the bank was giving away free ¹⁶. Who wouldn't volunteer to spend the whole week ¹⁷ at the Amazon? I think that I'd be really good at ¹⁸ all the different plants and ¹⁹.

As soon as Mrs Curtis looked at me, I ²⁰ that I hadn't been picked. She had the same expression on her face that she uses to tell us that we've got a maths ²¹ wrong as she said, "Maybe next time, Daisy." Jack Walters got picked instead, but he ²² his mind when he found out that we're only allowed to look at the webcams during our breaks and at ²³. He said that there was no ²⁴ that he was going to ²⁵ playing football in the playground. So Mrs Curtis ended up choosing me anyway! I don't mind having to do normal lessons I got nine out of ten on my spellings last week. Still can't spell rhinnosoraus, though.
