

Daily Learning Task 12

Year 3

Maths:

A 3D shape is a shape that can be measured on 3 dimensions (length, breadth and height).

Go on a '3D shape hunt' around your house and have a go at drawing some of the shapes you find (you might find it easier to use squared paper so I have included a grid on the last page).

Geometry (3D shapes)

3D Shapes

Cube

Cuboid

Square based pyramid

Cone

Triangular prism

Triangular based pyramid

Cylinder

Sphere

English:

PANDORA'S BOX

Have you ever heard of the story, 'Pandora's box'?

Can you find out what it is about and see if you can read it or watch an animation of the story online.

Imagine that you are given a box. Inside it you have to put in items that will tell someone **all about you**. They would look at the things you have put in and be able to tell **what sort of person you are** and what sort of things you **like doing**. For example, you may put in a football or skipping rope to show that you like to play sport. What things would you put in the box? Draw and label the things you would put in the box around your picture.

- Write the definition.
- Use it in a sentence.
- Count the vowels and consonants.

Think about your family, including grandparents, cousins etc. Can you construct a family tree to show how you are all related?

Ongoing tasks:

1. Carry out 15 minutes ERIC time
2. Read to someone else for 10 minutes.
3. Access 'Reading Plus' or 'Bug Club' each day.

Remember what Mrs Postle says: ‘Today a reader, tomorrow a leader!’
